

BOOTH LAYOUT FORMAT

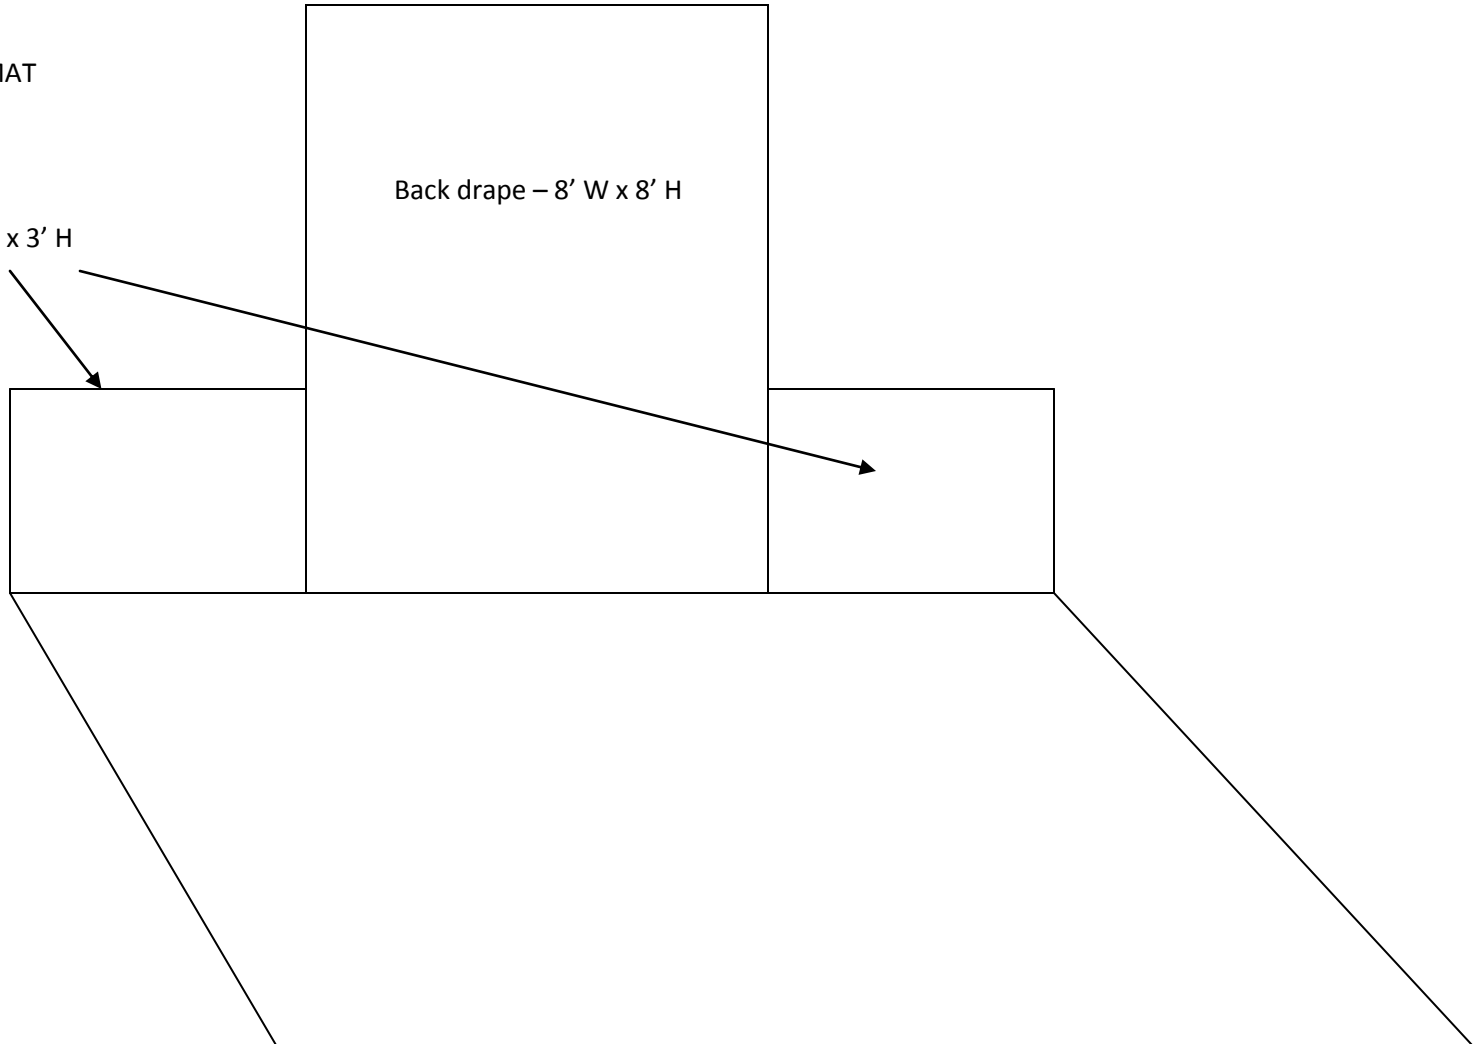

The above image is of one (1) 10'x10' booth with back and side draping, as provided in the LDSBA contract. The back draping is 8' in height and 10' in width. The side draping is 3' in height and 10' in length. The sides of the booth may extend to a height of 8' into the booth area for a length of 4' from the back toward the front. The remaining 6' of side length (front area) must stay at a 3' height.

(PLEASE see both sides)

END CAP LAYOUT FORMAT

Side Drapes 6'W x 3' H

Back drape – 8' W x 8' H

If you are requesting an end cap for your booth selection, please be aware of the above requirements for drape/booth material placement. The back drape/material can only be 8' tall for the center 8' of booth space. The remaining 6' on either side of the back must remain at the 3' height. This is to allow visual exposure to the booth spaces that are directly behind you, on both aisles. No exceptions, please.

The side drapes that extend from the back of the booth to the front are 10'L x 3'H and are optional.

(PLEASE see both sides)
